Michelle,

My site geologist overseeing Cascade's work will be Kit Carson, and he is prepared to provide sampling containers for USACE split samples (vertical profile groundwater samples).

Regards, Stan

Subject: installation of POHMW49 - split sample collection

Hi Stan,

Patrick (and later Brad) will be onsite to oversee installation of POHMW49 which is scheduled to begin mid week. Similar to OU3 soil samples, would you be able to supply sample bottles (VOAs) and ice for our split groundwater samples collected during groundwater profiling?

We'll collect ~15 samples (every 20 ft from groundwater table to 400-ft).

Please let me know if you can provide these items.

Thank you!
Michelle -
